

Intelligence: Multiple Perspectives

A supplemental text for courses in cognition, educational psychology, and general psychology, this text brings together all major intelligence perspectives and provides coverage of new theories. Written in an engaging style, *Intelligence* uses examples from history and contemporary life and provides frequent summaries. Features: * Provides a broad definition of intelligence by bringing together all the major perspectives. * Includes full descriptions of new theories of intelligence proposed by Michael Anderson, Stephen Ceci, Howard Gardner and Robert Sternberg. * Additional coverage of intelligence concerning the workplace, schooling and multi- and crosscultural perspectives.
