

# A Mind Powered Disease™: Recognizing and Treating Alcoholism to Find Success In Life Through the 12 Step Program

Bob Anderson's communication flows out of 44 years of living experience in recovery. Gently and repetitively, he exposes the mind-powered nature of alcoholism as he teaches about recovery. He provides personal examples to reveal both the strange and hopeless world of his old life as well as the transformation into a happily, usefully whole new life by the Twelve Step Program. Although he speaks as an alcoholic with alcoholism, he puts Twelve Step Recovery in the reach of anyone. A Mind-Powered Disease: Dispels the misconception that alcoholism is primarily an inability to control drinking. Describes how the obsessive mind functions as a mind-powered disease and compels repeat performances, which results in confusion and despair. Teaches how the application of the Twelve Step principles produces genuine recovery and true success in life through a change of character. Helps the sufferer to find true happiness, freedom and peace of mind as a way of life.
