

# A Study Of The Aerial Interdiction of Railways During The Korean War

This study undertakes to examine the aerial interdiction activities conducted against the enemy railway system by United Nations forces during the Korean War, June 1950-July 1953. It has three major goals: (1) to compile a concise history of these interdiction activities; (2) to evaluate the effectiveness of these efforts as it might relate to the conduct of the total war effort; and (3) to make recommendations pertaining to the future conduct of aerial interdiction.
