

<Advances in Neuro-Oncology, II

In this new volume, the new advances in basic science are described, along with improvements in diagnosis and in the conventional modes of therapy. New and promising approaches to therapy are detailed. This volume will serve to summarise some of the more intriguing advances in neuro-oncology and will be merely the second in a series of volumes which chronicle the evolution of this ever evolving, exciting and yet perpetually challenging field.

Neuro-oncology in 2016: Advances in brain tumour classification Official Full-Text Publication: Exciting New Advances in Neuro-Oncology: The Avenue to a accounting for over 60% of high-grade primary brain tumours [1, 2].
