

# A Short Manual of Comparative: Philology for Classical (Classic Reprint)

CM, cy 4i PREFACE. MORE than six years have passed since I undertook to write AS hort Manual of Comparative Philology for Classical Students. Considerable progress had been made with the work and several sheets were already printed off when in 1890 and again in 1891 such large additions were made to my work as a teacher in the University that it was impossible for me to complete the book immediately. Hence the long delay between its first announcement and its appearance. The book is intended for the use of Classical students who, without being professed students of Comparative Philology, desire some acquaintance with its principles as applied to Latin and Greek. Accordingly Parts II and III are devoted to what is practically a comparative grammar of those languages. As the book is not intended for comparative philologists I have not adduced, except in a few instances, words from Sanskrit or other languages of which the reader was likely to know nothing. On the other hand it seemed worth while to cite, where possible, forms from English, or from other members of the group of languages to which English belongs, when they have cognates in the classical languages. (Typographical errors above are due to OCR software and dont occur in the book.)
