

Childhood Non-Hodgkin Lymphoma (NHL), Burkitt, B-Cell, Lymphoblastic Lymphoma: Pediatric Cancer Guide to Symptoms, Diagnosis, Treatment, Prognosis, Clinical Trials (DVD-ROM)

This up-to-date and comprehensive DVD-ROM disc provides a superb collection of authoritative documents from the nations cancer experts on childhood Non-Hodgkin Lymphoma (NHL), including B-cell (Burkitt), diffuse large B-cell, lymphoblastic lymphoma, and anaplastic large cell lymphoma: causes, signs and symptoms, diagnosis, lab tests, treatment and management options, and ongoing clinical research. Every aspect of this cancer is thoroughly covered. For patients, families, and caregivers, practical information is provided in clearly written patient education documents, with valuable tips and helpful advice. For medical professionals, doctor references and texts have detailed technical information and clinical background material. Over twenty major types of pediatric cancers and tumors are fully covered, giving you the information and resources you need, including sources of help and support. In children, non-Hodgkin lymphoma (NHL) is distinct from the more common forms of lymphoma observed in adults. While lymphomas in adults are more commonly low or intermediate grade, almost all NHL that occurs in children is high grade. The incidence of NHL observed in children and adolescents varies depending on age, gender, and histology. Regardless of age or histology, males have a higher incidence than females. Burkitt lymphoma is much more common in males, with the highest incidence between the ages of 5 years and 14 years. The incidence of diffuse large B-cell lymphoma (DLBCL) increases with age in both males and females. The incidence of lymphoblastic lymphoma remains relatively constant across ages for both males and females. Utilizing the huge capacity of the DVD-ROM disc, disease-specific coverage is supplemented with a comprehensive multimedia cancer and health encyclopedia, featuring hundreds of reports, guides and audio

podcasts on a wide variety of cancer and health issues of critical importance to cancer patients. There is extensive coverage of the broad subject of cancer and its prevention and treatment (surgery, chemotherapy, radiation, advanced treatments, managing side effects). Documents and material from the National Cancer Institute (NCI), Centers for Disease Control and Prevention (CDC), Food and Drug Administration (FDA), National Institutes of Health (NIH), Environmental Protection Agency (EPA), Medline, Centers for Medicare and Medicaid Services (CMS), and Occupational Health and Safety Administration (OSHA) are included. Supplemental coverage includes: Clinical Trials Background Information, Workbook; In-Depth Program; Clinical Trials at NIH; How To Find A Cancer Treatment Trial; Taking Part in Cancer Treatment Research Studies; Access to Investigational Drugs; Taking Time: Support for People with Cancer; Facing Forward - Life After Cancer Treatment; When Someone You Love Is Being Treated For Cancer; Living Beyond Cancer: Finding a New Balance; Caring for the Caregiver; Young People With Cancer, A Handbook For Parents; When Cancer Returns; When Someone You Love Has Advanced Cancer / Support for Caregivers; Chemotherapy; Managing Chemotherapy Side Effects; Follow-up Care After Cancer Treatment; Radiation Therapy; Managing Radiation Therapy Side Effects; Cancer and the Environment; Cancer Resources; Online Cancer Fraud; FDA Office of Oncology Drug Products; HIPAA Privacy Rule; Patient Protection and Affordable Care Act (PPACA) - Understanding Obamacare and Options, Plans, Programs, Bill of Rights.
