

Collected Papers of Charles Sanders Peirce

Charles Sanders Peirce (1839-1914) is best known as the founder of pragmatism - the philosophy that assesses the meaning of what we say by its practical consequences. His writings cover a wide range of subjects and his influence can be seen in ethics, aesthetics, symbolic logic, religion, epistemology and metaphysics, and also scientific topics. The greater part of Peirces papers were unpublished during his lifetime and upon his death several hundred manuscripts were left to Harvard University. This eight-volume collection also includes Peirces writings on general philosophy, logic, pragmatism, metaphysics, experimental science, scientific method and philosophy of mind, as well as reviews and correspondence. Paragraphs are numbered for easy reference and contents arranged by subject.
