

Complementing Latin American Borders

The idea of complementing borders is appropriately ambiguous with respect to Latin America. People inhabiting cultural borders do not belong to either of the two sides, yet they are contained within the complementation that emerges when two or more cultures interdependently and incongruously interact. In giving an account of complementing borders, this volume alludes to the Latin American context through notions of rhythms and resonances, euphonies and discords, continuous flows and syncopies- all of which are found in everyday life, the arts, politics, economics, and social institutions and practices.
