Read on your PC, Mac, smart phone, tablet or Kindle device. Western medicine is no closer to finding a cancer cure, then it was 75 years ago. Meanwhile cancer has grown into a worldwide epidemic of staggering proportions. Despite the fact that there have been doctors, scientists and researchers who have discovered apparently effective solutions against cancer, except none of them has ever been taken into serious consideration by official medicine. In fact, most of them were in fact rejected out-front, even though the cures were documented. Anyone who dare bringing these cures to light are labeled as quacks, snake-oil salesmen, ostracized by the medical community, jailed and ultimately forced to leave the country. At the same time more than thousands of people die of cancer every day, without official medicine being able to offer a true sense of hope to those affected by it. Why? Because cancer is BIG business. The economics of cancer treatment are mind boggling. Cancer treatment is nearing the \$200 billion dollar make annually. Yet the cancer industry spends virtually nothing on education to prevent cancer, such as healthy eating, exercise and how to avoid toxins. Instead, the industry spends all its resources on treating cancer, garnering for themselves huge windfall profits in the form of ridiculously expensive cancer TREATMENTS-not to be confused with cancer CURES. So how do you keep this cancer money train going? Bury the cures. This book focuses on bringing to light some of the most popular alternative cures which are being attacked, criticized and prevented from being available in the market by medical profiteers. Make sure that if you or one of your loved ones should ever be diagnosed with cancer, that
