

Doing Philosophy

Clear and concise, this brief text is designed to assist students with no previous formal background in writing philosophy papers. Contents include topic selection, outlines, drafts, proper and improper quotation, argument development and evaluation, principles of good writing, style, criteria for grading student papers, and a review of common grammatical and dictional errors. In addition, the book devotes several chapters to basic concepts in logic, which have proven invaluable for philosophy students in the course of critically considering and writing about the ideas and arguments they encounter.
