

The Eating Handbook for Children with Autism: Comprehensive Common Sense Strategies

Do you have a child who only eats chicken nuggets, French fries and mac and cheese? Or how about pizza with no cheese and sauce? Worried sick about how few foods your child eats? Tired of having no idea what to put in your child's lunch bag? Feeling judged by friends and family because you can't get your child to eat? If so, then this book is for you! Written by an Occupational Therapist who has clinical expertise working with families for the past 17 years, this book provides easy to follow steps and practical strategies with action plans following each chapter that are specific to children with Autism Spectrum Disorders. This book was created for parents, grandparents, daycare providers, behavioural interventionists and other caregivers to provide essential principles associated with getting your child with autism to eat. You will learn about how to: set mealtime up for success, make mealtime fun, get your child involved with food, expand limited diets, implement sensory strategies that will keep your child at the table, manage oral sensitivities, and avoid food jags.
