

Pragmatic Philosophy: an Anthology

Collected in this volume are many of the most important writings of the three early pragmatists - Charles Sanders Peirce, William James, and John Dewey. Part I traces the attempts each of these philosophers made to construct a complete philosophical system and also reflect their disagreements about the interpretation and implications of the pragmatic criterion of meaning. Some of the cogent objections raised by Bertrand Russell, G. E. Moore, and Arthur Lovejoy to the early versions of pragmatism are reprinted in Part II. In its presentation of recent philosophic opinion on questions growing out of classical pragmatism, this book is unique. Part III includes selections from the work of philosophers such as C. I. Lewis and Charles Morris, who considered themselves within the pragmatic tradition; and also a number of articles which develop, utilize, or criticize recent adaptations of classical pragmatic arguments as they have been applied to current problems in scientific method, the philosophy of language, and the philosophy of mind. The collection aims to show the wide variety of ways in which the insights of contemporary philosophers have been shaped by, and in turn have influenced, the development of pragmatism.
