

## Essays and Aphorisms (Classics)

One of the greatest philosophers of the nineteenth century, Schopenhauer (1788-1860) believed that human action is determined not by reason but by will - the blind and irrational desire for physical existence. This selection of his writings on religion, ethics, politics, women, suicide, books and many other themes is taken from Schopenhauer's last work, *Parerga and Paralipomena*, which he published in 1851. These pieces depict humanity as locked in a struggle beyond good and evil, and each individual absolutely free within a Godless world, in which art, morality and self-awareness are our only salvation. This innovative - and pessimistic - view has proved powerfully influential upon philosophy and art, directly affecting the work of Nietzsche, Wittgenstein and Wagner among others.
