

## Essays and Reviews: 1959-2002

Bernard Williams was one of the most important philosophers of the past fifty years, but he was also a distinguished critic and essayist with an elegant style and a rare ability to communicate complex ideas to a wide public. This is the first collection of Williams' popular essays and reviews. Williams writes about a broad range of subjects, from philosophy to science, the humanities, economics, feminism, and pornography. Included are reviews of major books such as John Rawls' *Theory of Justice*, Richard Rorty's *Consequences of Pragmatism*, and Martha Nussbaum's *Therapy of Desire*. But many of these essays extend beyond philosophy, providing an intellectual tour through the past half century, from C. S. Lewis to Noam Chomsky. No matter the subject, readers see a first-class mind grappling with landmark books in real time, before critical consensus had formed and ossified.
