

First Opinion: Wholistic Health Care for the 21st Century (School of Metaphysics)

Everyone wants the security of knowing the best health care is available and affordable. Increasingly it is neither. The world is filled with ways to restore balance in the human body. For every ill there is a cure. Chinese medicine, Ayurveda of India, Greek medicine, homeopathy, and technological medicine of Western science all have a place. Yet as Hippocrates, patriarch of physicians, realized over two millennia ago, The natural healing force within each of us is the greatest force in getting well. This force is the awakening of supernatural powers. The power to perceive. The power to transform. The power to heal. First Opinion asserts that humanity's destiny does not lie in the chemistry and physics of 20th century science but in the evolutionary development of consciousness known as intuition. Intuition does more than reveal the future of health care, it is the future. Intuition synthesizes our understanding of ourselves as spiritual, mental, emotional, and physical beings. It brings new meaning to the terms early detection and preventative measures. Even now, intuition is being used by practitioners and patients to identify appropriate treatments for healing. Intuitive analysis unites the best the world has to offer. From surgery to acupuncture, from psychiatry to prayer, intuitive health analyses recommend those treatments which accelerate recovery and restore wholeness for the individual. It complements existing health care practices by drawing upon global healing knowledge. As we move into the next frontier, intuitive health analysis will become the first opinion we seek for our health, well-being, and peace of mind.
