

Honest Medicine: Effective, Time-Tested, Inexpensive Treatments for Life-Threatening Diseases

HONEST MEDICINE introduces four lifesaving treatments that have been effectively treating--and in some cases curing--people for 25-90 years. However, for reasons of profitability (or lack thereof), these treatments have not been universally accepted. The treatments are: Low Dose Naltrexone for autoimmune diseases (e.g., multiple sclerosis, lupus, rheumatoid arthritis, Crohns disease, etc.) HIV/AIDS and some cancers; the Ketogenic Diet, for pediatric epilepsy; intravenous alpha lipoic acid, for terminal liver disease and some cancers; and Silverlon, for non-healing wounds. This book has already received a great deal of praise: - Ronald Hoffman, MD: I predict that Honest Medicine will become an instant classic. - Jeffrey Dach, MD: A revolution is at hand, and Julias new book, Honest Medicine, is leading the charge with banner held high. - Mary Shomon: Julia Schopick is one of those rare people who can go through an agonizingly difficult experience and go on to transform her pain into a passionate, clear-headed campaign to help others. - David Brownstein, MD: Honest Medicine should be required reading for all physicians and patients searching for safe and effective therapies.
