

## How to Think about Meaning (Philosophical Studies Series)

According to truth-conditional semantics, to explain the meaning of a statement is to specify the conditions necessary and sufficient for its truth. This book develops a more radical mentalist semantics by shifting the object of semantic inquiry. Classical semantics analyzes an abstract sentence or utterance such as Grass is green; in attitudinal semantics the object of inquiry is a propositional attitude such as Speaker so-and-so thinks grass is green.
