

## Colon Cancer Find & Stop (Cancer.im Series)

Dr. Buckman, senior author of the book states, Sometimes I find new cases due to rectal or colon pain, bleeding, weight loss, constipation, or stool irregularities. We have a special interest in colon cancer due to the environmental factors associated with it and since most colorectal cancer tumors are thought to be cyclooxygenase-2 (COX-2) positive and its therapeutic response to anti-inflammatory treatment or prevention, and due to our interest in early detection of cancer. This book discusses risk factors, diagnosis, management, prevention, the role of diet, therapy, and many other topics of colon cancer.
