

Management of Castration Resistant Prostate Cancer (Current Clinical Urology)

This volume provides new data about the molecular biology of CRPC and a review of the definition, staging and prognostic factors that define CRPC. The book features an in depth review of proven therapeutic options, including bone targeted therapies, immunotherapy, chemotherapy and hormonal based therapies. Combination therapy as well as novel targeted approaches presently under investigations are also reviewed. The text provides up to date guidelines and algorithms for the management of CRPC based on international guidelines presently available as well as evidence based medicine. As a concise yet comprehensive summary of the current status of the field, Management of Castration Resistant Prostate Cancer serves as a very useful resource for physicians and researchers dealing with this challenging malignancy.
