

Un-Dieting Liberty: The 28 Day Plan to Lose Weight and Feel Great

Simple Changes, One Day At A Time This book isn't just another healthy diet plan. Instead it's about UN-Dieting - how to change just one habit a day, for the next 28 days, towards a healthy lifestyle that includes weight loss and weight control for life. Step-by-step, you will make one small change each day, replacing an old habit or diet plan that isn't working for you or your health, to a new and better habit. This healthy living change happens without counting points or calories, without having to search for odd or expensive supplements, without needing a gym membership and without anything you can't find at your local grocery store, market or already on your food shelves. It's NOT Your Fault! It's not your fault that you've struggled in the past, and that it's come to this body you see in the mirror. It IS your fault if now you do nothing to help it on the journey to a healthy lifestyle. It IS your fault if you do nothing to lose weight, hoping that when, inevitably, you develop the weight-related illnesses - diabetes, heart disease, stroke, and some forms of cancer - medical science will somehow save you, and prevent you from a life that ends, too soon. It doesn't have to be this way - your body and your life don't need to be this way. What Do You Get In This Book? This book shows you how to change just one habit today - then another one tomorrow, and another on Day Three - while continuing to do the new habits you adopted on the previous days. None of these habits are hard to do, though you can expect that you will be eating differently than you are now, perhaps at different times and different amounts of food. My promise is that you will NEVER be hungry, though you probably will miss some familiar (but unhealthy) foods and snacks. There likely will be times you want to quit, and eat a bag of chips. Or drink a bottle of Coke. You will learn healthy lifestyle tips and strategies to power

through these trying times and keep the promise you make to yourself to make small but meaningful changes, day by day, to get to that important goal of a healthy diet and healthy living. What you can eat (almost everything) Why WHEN you eat matters The best way to start exercising, if you're currently a couch potato (and, good news, it's free!) How to put an end to food cravings, and especially sugar craving, FOREVER One trick that will mean you never overeat again How to enjoy a restaurant meal or special occasion and STILL lose weight How to manage Cheat Day How to get more flavors into all your meals Ways to save on your grocery bills and still have a healthy diet with meals you and your family will enjoy and look forward to How to STOP stress eating What to do to Rev UP your metabolism Tired Of The Diet Plan Blues? If you have tried, and failed, with diet after diet, only a few pounds of weight loss, only to see them come right back You wish you could feel better and look better with a healthy lifestyle or a diet plan you like This might be the book you need now. It assumes your current diet plan just isn't working, or you're done with diets, but looking for fast, safe and easy weight loss that works in the real world. Who Is This Book For Anyone who is tired of weight loss diets that fail them, expensive diet programs and struggling with their weight. How could your life be different, without the weight or the endless fad diets? Where will your weight be, a month from today? If you're tired of diets that don't work, read on, and let's get started!
