

The Stones of Venice, Travellers Edition (2 Volume Set)

The Stones of Venice is a three-volume treatise on Venetian art and architecture by English art historian John Ruskin, first published from 1851 to 1853. This 3-volume was later abridged into 2 volumes in this Travellers Edition. John Ruskin wrote this work intending to prove how the architecture in Venice exemplified the principles he discussed in his earlier work, The Seven Lamps of Architecture, Ruskin examined the city in detail, describing for example over eighty churches. He discusses architecture of Venices Byzantine, Gothic and Renaissance periods, and provides a general history of the city as well. The Stones of Venice aroused considerable interest in Victorian Britain and beyond. The chapter The Nature of Gothic (from volume 2) was admired by William Morris, who published it separately in an edition which is in itself an example of Gothic revival. The book inspired Marcel Proust (the narrator of the Recherche visits Venice with his mother in a state of enthusiasm for Ruskin) and in 2010 Roger Scruton wrote that the book was, the greatest description in English of a place made sacred by buildings.
