

Selections From the Works of the Baron De Humboldt, Relating to the Climate, Inhabitants, Productions, and Mines of Mexico (Classic Reprint)

Excerpt from Selections From the Works of the Baron De Humboldt, Relating to the Climate, Inhabitants, Productions, and Mines of Mexico. The object of this work is to present in a condensed form some of the information which is displayed at large in two celebrated works of M. le Baron de Humboldt. This peculiarly gifted traveller, after traversing countries whose future importance to Europe his discriminating foresight enabled him to predict, gave to the world descriptions of these vast territories, which, while they astonish us by the extent of research, and the varied science they display, are rendered even more valuable by the accurate truth and the candid and manly spirit which pervade them. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com. This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
