

## Warplanes of the Fleet

Fielding one of the worlds largest and most potent air forces, the US Navy operates a plethora of warplanes from the decks of its carriers - from state-of-the-art fighters, electronic jammers and surveillance platforms to training, tanking, rescue and on-board delivery assets. Warplanes of the Fleet examines the Navys 10 carrier-based aircraft (including helicopters) in extraordinary detail, describing their development, avionics, weapon systems, missions and unit operators. This important reference work is packed with information, and superbly illustrated throughout with hundreds of color photos and detailed artwork. The aircraft profiled include: F/A-18C/D Hornet; F/A-18E/F Super Hornet; F-14 Tomcat; Ea-6B Prowler; E-2 Hawkeye; S-3 Viking; C-2 Greyhound; T-45 Goshawk; HH/MH/SH-60 Seahawk; and MH-53 Sea Dragon.
