

Paleo Simplified: Eliminate Sugar Cravings, Fatigue and Lose Weight

The Paleo Diet is a relatively new way of eating. But it is not one of those fad diets that come and go quickly. This is a way of eating that is best suited to your body and your life as a human being. All the packaged and processed foods in your house right now are full of sugar and other ingredients that are super harmful to you. Some of these are: corn syrup, aspartame, modified corn starch, MSG and a long list of other ingredients that are used in food not because they are good for you, but because they are cheap to produce and give the foods flavor. Most of the foods we eat today are nothing but empty calories. They have no or little nutritional value. When I first did the Paleo Diet, I lost 22 lbs in just a few weeks. But the most important thing that I regained was increased energy and mental clarity. This meant that I could concentrate better and had more motivation to finish important tasks. I no longer suffered from fatigue. Waking up in the morning became much easier and I was no longer groggy. Folks, you are what you eat. What you put into your mouths will affect who you are physically as a person. I urge you to give the Paleo way of eating a try. You will love it.
