

Reformism or Revolution: Marxism and socialism of the 21st century: A reply to Heinz Dieterich

The declarations of Hugo Chavez in favour of socialism have provoked an important debate in Venezuela and internationally. However some have concluded that the old ideas of Marxism are no longer valid and that it is necessary to invent a completely new and original theory of Socialism of the 21st century. This book is a reply to that view - expressed by Heinz Dieterich amongst others - and a defence of the fundamental ideas of Marxism and scientific socialism against these revisionist arguments. Contents include:

Philosophy and science Dieterich and historical materialism History and economics Outline of Marxist economics

The economics of Socialism of the 21st century Socialism or Stalinism? The future of the Cuban revolution The Venezuelan revolution and more.....

Together with Reason In Revolt (also available from Wellred) this book is essential reading for all those who wish to understand Marxism and its relevance to today's world.
