Fat and Cholesterol Conspiracy Doctors, dieticians, and even giant government-funded organizations have been pushing a low-fat protocol for many decades now. But did you know that this agenda was based on one rather dubious study? With *Saturated Fact*, you'll discover the real cause of elevated cholesterol. (Hint: it's not saturated fat!) Learn how the body works and what you really need to be eating to stay healthy and avoid diseases like cancer and heart disease. *Eat Like Your Ancestors* Why is it that our society today, with all its advances, is plagued with these so-called modern diseases? Authors Josh and Jeanne Rubin argue that the answer is on our plates. In addition to the scientific evidence in favor of eating more saturated fat, there also exist countless studies of traditional populations around the globe who manage to stay disease-free while eating enormous amounts of cholesterol and saturated fat. Heart disease, cancer, dementia, diabetes, and obesity are virtually unknown in these societies. With *Saturated Fact*, you'll be in on their secrets so you too can enjoy abundant health and a long life. Finally get the skinny on which fats are good and which are bad!
