

## Three Dialogues between Hylas and Philonous

Three important concepts discussed in the Three Dialogues are perceptual relativity, the conceivability/master argument (master argument was coined by Andre Gallois), and Berkeleys phenomenalism. Perceptual relativity argues that the same object can appear to have different characteristics (e.g. shape) depending on the observers perspective. Since objective features of objects cannot change without an inherent change in the object itself, shape must not be an objective feature.
