

## Splice (Volume 4, Issue 2)

Splice bridges the gap between contemporary cinema and intelligent discourse. It is a serial publication that facilitates the study of contemporary cinema, and selected films fall into the category of popular, sometimes blockbuster, cinema?the success of these films often excluding them from serious analysis. Published three times a year, Splice is a practical solution for teachers and students of film studies, media studies, and related disciplines. Volume 4, Issue # 2, focuses on recent, internationally known, non-English language cinema, such as Michael Haneke's Cache (Hidden) (2005).
