

The Neutral: Lecture Course at the College de France (1977-1978) (European Perspectives: A Series in Social Thought and Cultural Criticism)

I define the Neutral as that which outplays the paradigm, or rather I call Neutral everything that baffles paradigm. With these words, Roland Barthes describes a concept that profoundly shaped his work and was the subject of a landmark series of lectures delivered in 1978 at the College de France, just two years before his death. Not published in France until 2002, and appearing in English for the first time, these creative and engaging lectures deepen our understanding of Roland Barthes intellectual itinerary and reveal his distinctive style as thinker and teacher. The Neutral (*le neutre*), as Barthes describes it, escapes or undoes the paradigmatic binary oppositions that structure and produce meaning in Western thought and discourse. These binaries are found in all aspects of human society ranging from language to sexuality to politics. For Barthes, the attempt to deconstruct or escape from these binaries has profound ethical, philosophical, and linguistic implications. The Neutral is comprised of the prewritten texts from which Barthes lectured and centers around 23 figures, also referred to as traits or twinklings, that are possible embodiments of the Neutral (sleep, silence, tact, etc.) or of the anti-Neutral (anger, arrogance, conflict, etc.). His lectures draw on a diverse set of authors and intellectual traditions, including Lao-tzu, Tolstoy, German mysticism, classical philosophy, Rousseau, Baudelaire, Walter Benjamin, and John Cage. Barthes idiosyncratic approach to his subjects gives the lectures a playful, personal, and even joyous quality that enhances his rich insights. In addition to his reflections on a variety of literary and scholarly works, Barthes personal convictions and the events of his life shaped the course and content of the lectures. Most prominently, as Barthes admits, the recent death of his mother and the idea of mourning shape several of his lectures.
