

The Path on the Rainbow: An Anthology of Songs and Chants from the Indians of North America

The poetic faculty is, of all mans modes, the most responsive to natural environment, the most sensitive and the truest record of his reactions to its skyey influences, its floods, forests, morning colors. It is the first to register the rise of his spirits to the stimulus of new national ideals. If this were not so there would be no such thing as nationality in art, and it is only by establishing some continuity with the earliest instances of such reaction that we can be at all sure that American poetic genius has struck its native note. Therefore it becomes appropriate and important that this collection of American Indian verse should be brought to public notice at a time when the whole instinctive movement of the American people is for a deeper footing in their native soil. It is the certificate of our adoption, that the young genius of our time should strike all unconsciously on this ancient track to the High Places.
