

The Studies of Traditional Chinese Medicine Theory and Clinical Thinking-18 kinds of Wang Qi Medical Books-2 (Chinese Edition)

The book is the second book of 18 kinds of Wang Qi Medical Books. The whole book is divided into four chapters: the first chapter describes the background, significance, philosophical basis of the original thinking studies of traditional Chinese medicine, elaborating the scientific connotation of the original thinking models of traditional Chinese medicine and the demonstrations of the original thinking models of traditional Chinese medicine by related experts. The second chapter discusses the importance of thinking of the traditional Chinese medicine theory, explaining the forms and qualities of the thinking of the traditional Chinese medicine theory, comparison of the theoretical thinking of Chinese and Western medicine, specifying limitations and developmental way of traditional Chinese medicine theory thinking. The third chapter is clinical thinking of Chinese medicine, discussing the status quo and confusion of traditional Chinese medicine clinical thinking, and exploring the strategy to solve traditional Chinese medicine clinical thinking and construction of clinical thinking treatment model. The fourth chapter introduces thinking model of prescription application to clarify the relationship of traditional Chinese medicine thinking and prescription application from the classical prescription, famous prescription, special prescription, small prescription, self-prescription, identifying prescription, the main disease main prescription, etc. to further reveal the regularity of the Chinese medicine thinking in multi-aspect, multi-level, multi-angle way.
