

## Inside Hitlers Germany

There have been numerous histories of World War II and many analyses of the Nazi Party. But what was it like actually to live under the Nazi Regime? Inside Hitlers Germany attempts to answer this question. This book looks at all aspects of life under the Nazis, including during the early 1930s, when Nazism brought economic benefits and before the full horrors of the racism at the heart of the regime were revealed. The role of women and children in the Nazi state, the changing face of popular culture and high art, the position of industry, the part played by the army, and the integration of the Nazi Party itself into German life are covered in full. Important questions, such as the attitude of ordinary Germans to racist policies and the nature of the German resistance to Hitler, are also addressed. Chris Mann is a lecturer in European history at the University of Surrey and University College, London. A holder of a doctorate in war studies from Kings College, London, his author area of expertise is Scandinavian military history in the twentieth century, specifically during World War II. He is the author of Norwegian Armed Forces in Exile 1940-45 and The T-34, and co-author of Inside Hitlers Germany. He currently lives in London.
