

Harnessing the Powers of the Unseen World: Tapping an Unlimited Power Source

We are honored to publish yet another rediscovered work of the great, late pioneer in New Thought, William Walker Atkinson. In this 285-page primer the Atkinson covers from A to Z Telepathy, Natures Finer Forces and all of the Higher Spirit Manifestations. As always is style is clear and too the point. Heres a short except: One of the most common mistaken conceptions of the average student of the occult sciences, and of so-called psychic phenomena in general, is that which may be expressed by the term supernatural. This term, as you know, is used to express the idea of that which is outside of the realm of Nature, and of Natures laws. Knowledge Versus Faith As a matter of fact, as all the advanced students and teachers of the occult doctrine know full well, we have no direct knowledge whatsoever of anything that is outside of the realm of nature, and of Natures laws. It is true that we may, by an act of faith, profess to believe in powers and beings entirely apart from the great realm of Nature in fact, most persons do believe in such powers and beings in connection with their formal religion but their belief is entirely within the category of Faith, and is not even pretended to be based upon actual experience and phenomenal manifestation. Any student who is interested in the vast invisible world and its powers should consider reading this work.
