Tired of counting calories; far too busy to exercise and eat properly Lisa knew that the practical side of the weight loss regime needed to be simple, easy and effective. By making just small changes to her daily routine Lisa started to see the weight drop off but it was when she examined the reasons she had become fat in the first place, that was when the Happiness Formula was born. In this book the diet is simple and easy to use - a return to basics. The exercise program takes just five minutes three times a day and an action plan for putting all three elements of this program into place in your life is included. But this book will do so much more than just help you increase your energy levels and lose weight, it will help you change your life.
